

REGULATORY COMPLIANCE SOLUTIONS

SUSTAINABILITY

Raland Compliance Partners is your trusted partner delivering **sustainable** Quality, Regulatory, and Clinical compliance solutions.

One of the biggest challenges most companies face is **Compliance Sustainability**. There's nothing worse than spending time and money to improve your systems only to see them slide out of compliance over time. Compliance is a journey, not a snapshot. There is no magic bullet. Sustained compliance requires dedicated and continued effort to do the right thing, every time, even when it's not convenient.

At Raland Compliance Partners, our entire approach is designed for **sustainability**. Our strategic consulting, paired with pragmatic, right-sized compliance solutions is supported by effectively written SOPs, customized training, and periodic maintenance auditing to assure **sustainable compliance**.

The following steps outline our full-lifecycle approach to **Compliance Sustainability**:

- Assess – To identify compliance issues
- Design – Create a plan of action
- Document – Build a knowledge base of documentation and training material
- Execute – Execute the compliance tasks and activities
- Train – Resolve compliance issues
- Sustain – Use regularly scheduled training and periodic maintenance audits
